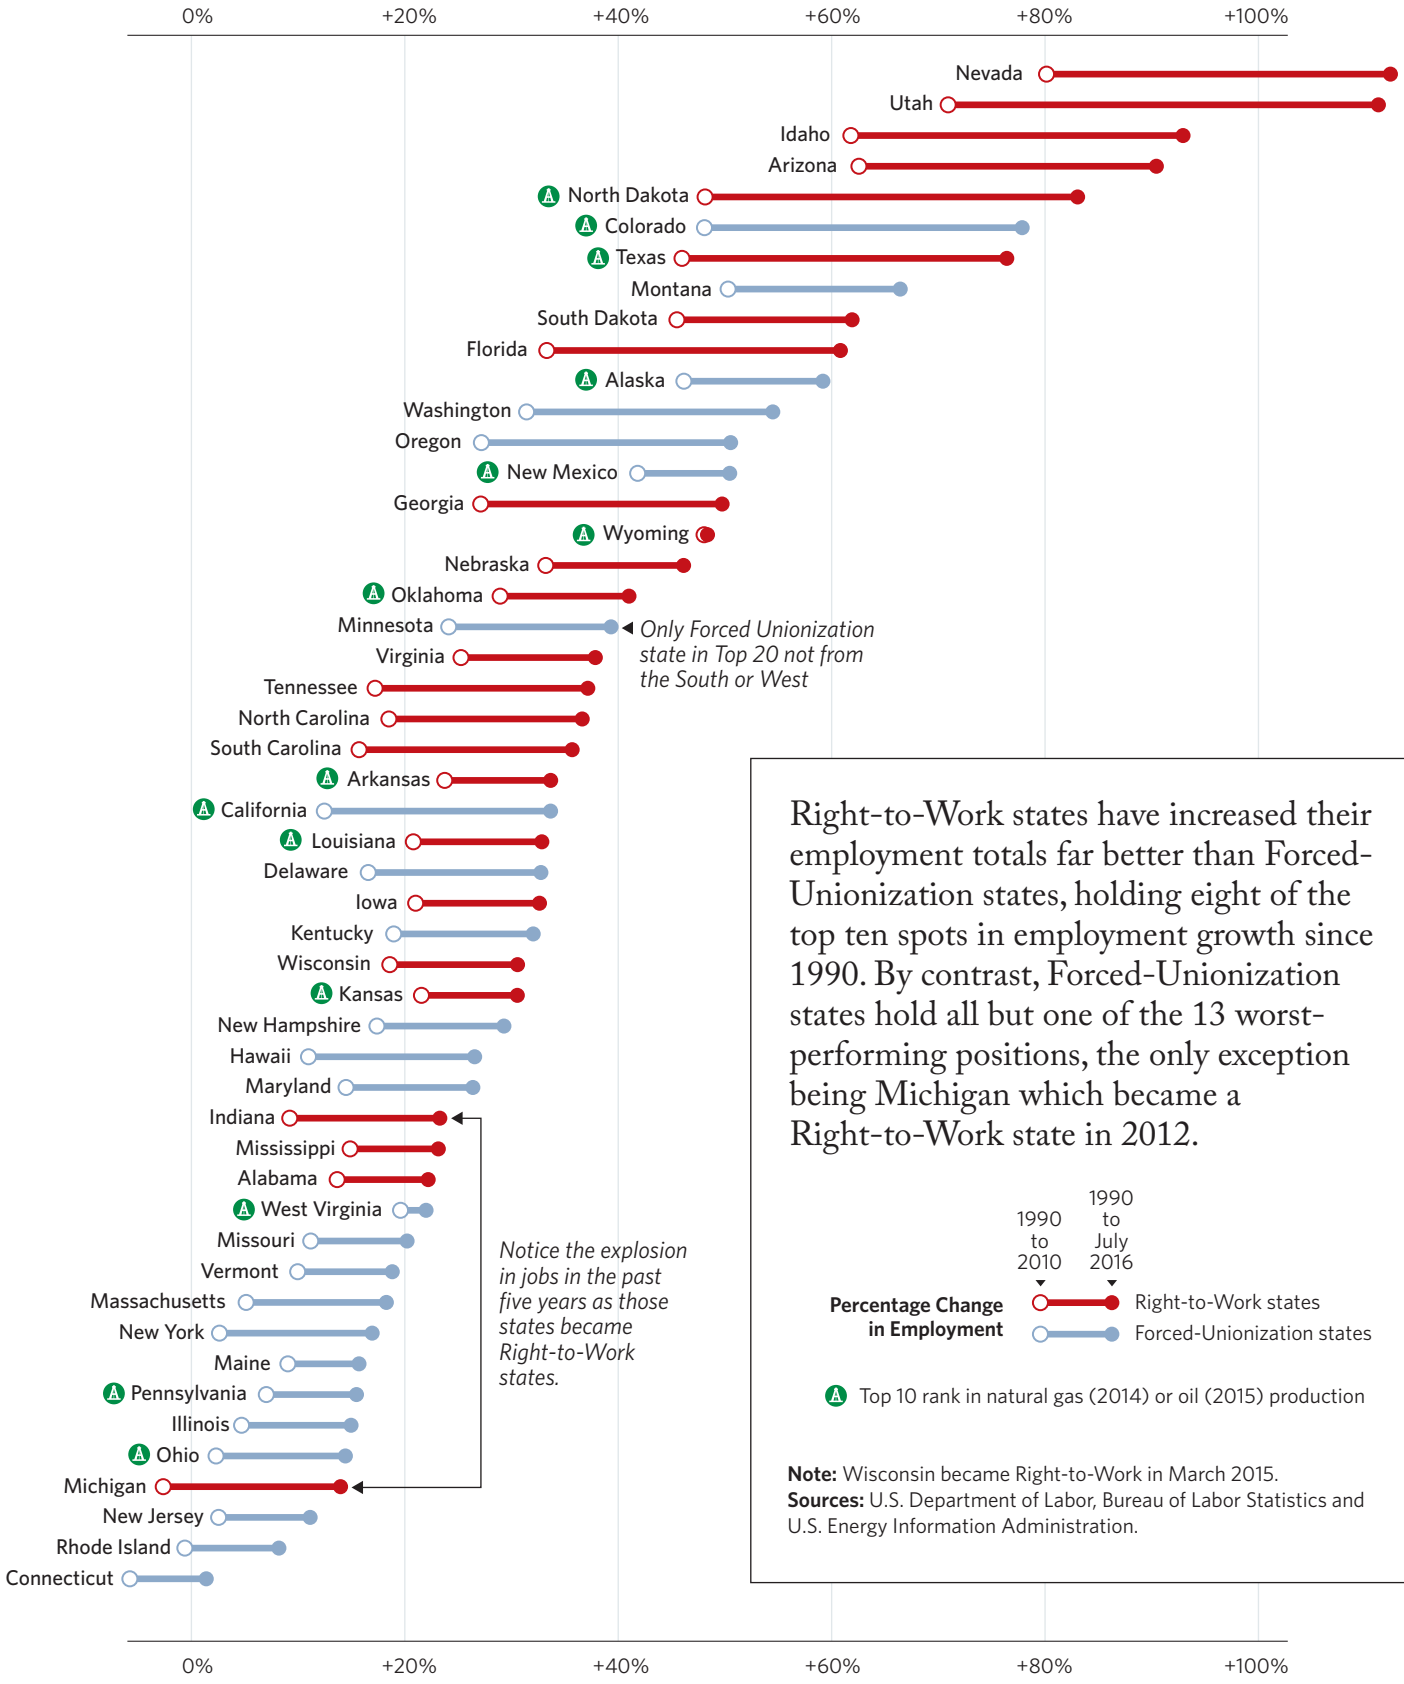
Right-to-Work States Dominate Economic Recovery



Right-to-Work states have increased their employment totals far better than Forced-Unionization states, holding eight of the top ten spots in employment growth since 1990. By contrast, Forced-Unionization states hold all but one of the 13 worst-performing positions, the only exception being Michigan which became a Right-to-Work state in 2012.

Note: Wisconsin became Right-to-Work in March 2015.
