---

**Survey Methodology**

This survey was conducted dialing both automated landline and live cell phone sample. The sample used for this survey was randomly drawn from a state of Nevada voter file. This survey was weighted based upon past general election voting demographics for the non-primary, "middle" voting population. The interviews were conducted December 5<sup>th</sup> - 6<sup>th</sup>, 2016. Three attempts were made to interview each household in the sample. This survey has a margin of error of +/- 3.55% at the 95 percent confidence interval.
