Change in Employment

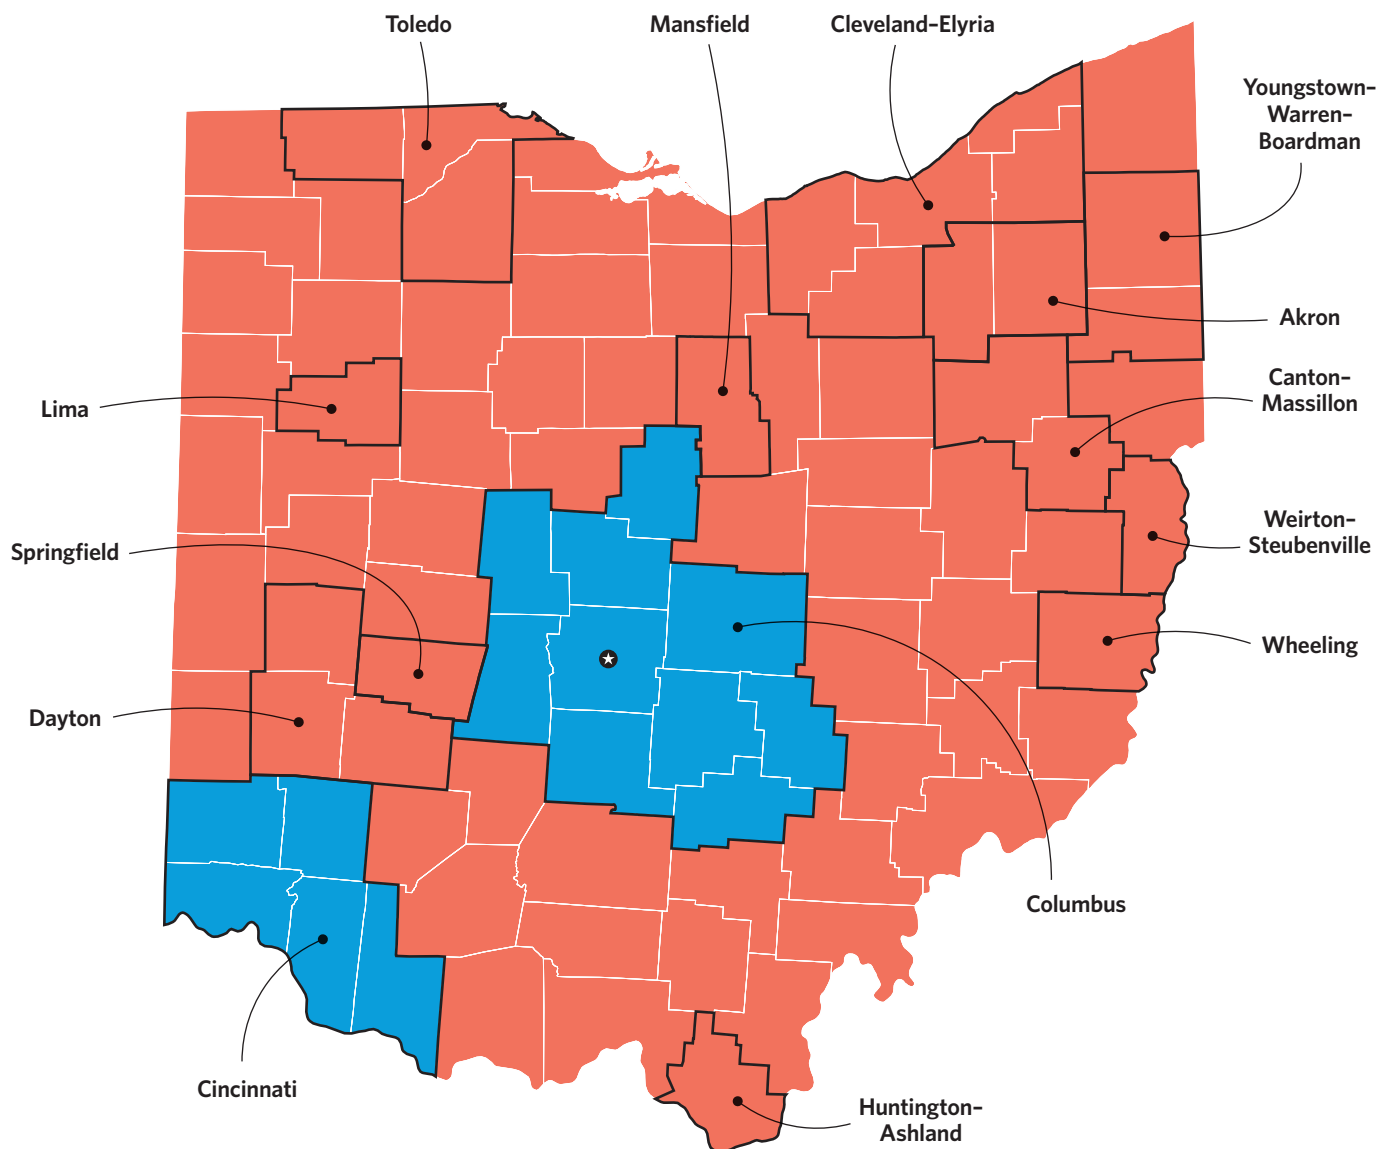

Changes in Employment, by Ohio Metro Area

JobsOhio was touted as the solution to job losses from the Great Recession, but outside of Columbus and Cincinnati the program has been a failure. No other metropolitan statistical area (MSA) in Ohio has reclaimed enough jobs in the JobsOhio era to offset losses from the decade prior. Cleveland has added only 12,741 jobs since 2010, which covers one-sixth of the jobs it had lost. And five MSAs, along with all other areas outside metropolitan centers, have seen only unrelenting job losses.
